

See Status for Encryption in Progress Drive in OSX

Tuesday, 21 October 2014

Last Updated Tuesday, 21 October 2014

If you've choose to encrypt a hard drive in OSX and you want to see the status of the encryption process in Mac OSX run the following command from OSX's Terminal:

```
diskutil cs list
```

If the drive still convert the partition to encrypted one you will see:

Conversion Status: Converting

If the process is finished, you will see:

Conversion Status: Complete

You might also be interested in the progress time of encryption. Look for:

Conversion Progress: x%

section. Where x is the percentage of encryption process.
