

Install MariaDB in FreeBSD

Saturday, 11 April 2015

Here is a quick how to install MariaDB in FreeBSD:

Install MariaDB FreeBSD package from FreeBSD repository:

```
pkg install mariadb100-server
```

Add a line in /etc/rc.conf to start MariaDB server at boot:

```
mysql_enable="YES"
```

Start the service:

```
service mysql-server start
```
