

FreeBSD pam_chauthtok(): error in service module

Tuesday, 01 March 2011

If you get on FreeBSD the following error:

```
pam_chauthtok(): error in service module
```

when trying to login as root from console, after you've upgraded from 7.x to 8.x release then boot to single mode choosing single mode from start menu or press space when boot counter starts then type

```
boot -s
```

And in single mode remove root user and add a new one.
