

Convert CD and DVD images to ISO format

Friday, 14 October 2011

Last Updated Friday, 14 October 2011

If you have a different format rather than ISO and FreeBSD cannot mount that format you can convert that format to ISO using tools available in FreeBSD's ports.

Convert .NRG Files to ISO

This utility convert Nero files to ISO:

```
cd /usr/ports/sysutils/nrg2iso
make install clean ; rehash
```

to use it:

```
nrg2iso image.nrg image.iso
```

Convert .MDF files to .ISO file

This utility convert Alcohol 120% files to ISO:

```
cd /usr/ports/sysutils/mdf2iso
make install clean ; rehash
```

to convert run:

```
mdf2iso image.mdf image.iso # --cue will generate cue file
```

Convert from .UIF file to .ISO file

This utility convert MagicISO files to ISO:

```
cd /usr/ports/sysutils/uif2iso
make install clean ; rehash
```

to convert run:

```
uif2iso file.uif file2.iso
```

Convert from a .DAA file to .ISO file

```
cd /usr/ports/sysutils/daa2iso
make install clean ; rehash
```

Convert from a .CCD file to .ISO file

```
cd /usr/ports/sysutils/ccd2iso
make install clean ; rehash
```

Other usefull tools

iat is a Iso9660 Analyzer Tool, very usefull to analyze different cd/dvd image formats.

```
cd /usr/ports/sysutils/iat
make install clean ; rehash
```
