Display elements of a NSArray array using fast enumeration
Saturday, 05 November 2011
Last Updated Saturday, 05 November 2011

Let's say we want a display every element of a NSArray array. For that we will use fast enumeration:

```
for ( element in array ) { // code }
```

An example will make it easyer to understand:
main.m // display elements of a NSArray#import <Foundation/Foundation.h>

```
int main (int argc, const char * argv[])

{

  @autoreleasepool {

    NSLog(@"Display elements of an array");

    NSString *element;

    NSArray *array;

    array = [NSArray arrayWithObjects:@"value1", @"value2", @"value3", nil];

    for (element in array) {

      NSLog(@"%@",element);

    }

  }

  return 0;

}
```
