

warning: Semantic Issue: Writable atomic property 'mode' cannot pair a synthesized setter/getter wit

Thursday, 10 November 2011

If you get the following error when trying to compile a Cocoa Project in XCode 4.2:

warning: Semantic Issue: Writable atomic property 'mode' cannot pair a synthesized setter/getter with a user defined setter/getter

To remove the warning you could either:

- declare that property nonatomic, like for example:

```
@property (nonatomic) int var1;
```

or:

- use @synthesize and use getter and setter (instead of your own manually defined getter and setter)

or:

- use @dynamic instead of @synthesize

or: do not use @properties at all.
