

Print UNICODE Chars in C/C++

Saturday, 12 November 2011

Last Updated Saturday, 12 November 2011

For that purpose we will use 'u' character. UNICODE-8 is on 2 bytes, 4 digits. See next example:

```
unicode_example_in_c.cc#include <iostream>
```

```
using namespace std;
```

```
int main(void)
```

```
{
```

```
    char const *greek = "\u03A9\u03A8\u03EA";
```

```
    printf("char: %s\n", greek);
```

```
}
```
