

Convert ISO file to DMG file or convert DMG to ISO file

Thursday, 19 January 2012

Last Updated Thursday, 19 January 2012

It is possible in OSX to convert a file from DMG format to ISO format or viceversa.

To convert from ISO to DMG run in OSX's Terminal:

```
hduutil convert in_file.iso -format UDRW -o out_file.dmg
```

To convert an image file from DMG to ISO run in OSX's Terminal:

```
hduutil convert in_file.dmg -format UDTO -o out_file.iso
```

Note: Before converting make sure your in_file is ejected (not mounted).
