

Firefox 10 in FreeBSD Ports

Friday, 03 February 2012

Last Updated Friday, 03 February 2012

After just few days after Mozilla released Firefox 10, the browser is available in FreeBSD's ports. Hail to the port maintainer!

Just fetch latest cvs/svn source tree and then:

```
cd /usr/ports/www/firefox
make install clean
```

And voila:

```
# pkg_info | grep firefox
firefox-10.0,1    Web browser based on the browser portion of Mozilla
```
