

First post for Python Tips

Tuesday, 07 February 2012

Last Updated Tuesday, 07 February 2012

You will find Python a nice scripting languages, very usefull and easy to learn. And very powerfull. You'll see its syntax is simple and clean. You can use it from small script to complex apps. Exporting data from apps like Blender can be done easely with Python. Web apps can be quickly created. Even sysadmin task can be simplified with Python. Or working with graphic files.

Welcome to Python world!
