

Failed to create the VirtualBox COM object

Sunday, 04 March 2012

Last Updated Sunday, 04 March 2012

If you get the following error when trying to run VirtualBox on FreeBSD:

```
Failed to create the VirtualBox COM object
```

Then to solve the problem just delete .VirtualBox directory from your home dir.

Also you could delete some VirtualBox temp files from /tmp:

```
cd /tmp ; rm -rf .vbox-*-ipc
```

If you still did not solved your problem and pressing details the verbose error is:

```
Callee RC:  
NS_ERROR_ABORT (0x80004004)
```

then you must recompile the kernel with the following option:

```
option COMPAT_IA32      # works on FreeBSD up to 8.x
```

If you have FreeBSD 9.x or 10.x use instead:

```
option COMPAT_FREEBSD32
```
