

Enable or Disable gdm in Solaris

Monday, 04 March 2013

Last Updated Monday, 04 March 2013

To see the status of gdm in Solaris run (run as root):

```
svcs gdm
```

you will get something like this:

```
STATE      STIME    FMR|online      16:38:17 svc:/application/graphical-login/gdm:default
```

To deactivate/disable gdm run:

```
svcadm disable gdm
```

To activate it run:

```
svcadm enable gdm
```

You might need to install slim_install package:

```
pkg install slim_install
```
