

# Installing and Managing Mac Ports (Quick Guide)

Friday, 15 November 2013

Last Updated Friday, 15 November 2013

To update your Mac Ports ( macports ) system run:

```
sudo port -v selfupdate
```

To rebuild all installed Mac Ports after running an selfupdate:

```
sudo port rebuild installed
```

To install a port run (where cppcheck is the port we want to install):

```
sudo port install cppcheck
```

To upgrade old ports after running a selfupdate run:

```
port upgrade outdated
```

To uninstall a port run:

```
sudo port uninstall TeXShop
```

See the version of Mac Ports:

```
port -v
```
